

Power Your Administrative Compliance Program

Introducing Exos by MedStack, with policy templates, employee privacy training, evidence generation capabilities, and more. Built specifically for the needs of digital healthcare, Exos by MedStack is the only administrative compliance offering that is optimized for fast tracking HIPAA and PIPEDA compliance.

The Fastest Path to 100% HIPAA Compliance

Exos by MedStack combined with MedStack Control delivers a top-to-bottom healthcare data privacy compliance solution like no other.

Fast track your way to a fully defined compliance program in less than 2 weeks

Understand and prove how policies address compliance framework mandates like HIPAA and PIPEDA

Stay on top of compliance landscape changes with push updates to policies and procedures

Operating a Compliant Digital Health Company Just Got Easier

Administrative Policy Templates

Skip the hassle of creating policies from scratch and the frustration of decoding compliance legislation.

Administrative Procedure and Task Builder

Create actionable playbooks and delegate routine tasks when a new procedure is started.

Employee HIPAA Privacy Training

Ensure your employees are prepared to handle PHI and boost your organization's ability to tackle cybersecurity threats.

Evidence Generation and Asset Tracking System

Automate task assignment to generate evidence driven by procedures and track historical evidence for audit readiness.

The benefits of a GRC tool, coupled with the power of a platform.

Eliminate drift between technical implementation and compliance attestations. Exos policies and procedures are predefined by the inherited safeguards implemented in MedStack Control and reflect the way your application operates in real-time.
