

The *go-to compliance solution* for digital health

MedStack makes it easy for digital health application innovators to build, launch and scale compliant cloud applications that automatically meet the data privacy and security requirements of today's healthcare enterprise systems.

Built specifically for the needs of the healthcare industry, we are the only solution that combines the power of a developer-friendly platform with built-in security and provable compliance, so you can confidently provide the assurance needed to sell your application.

Compliance

Meet Compliance Requirements

- Compliance-as-code
- Pre-written standards-aligned security policy documentation mapped to inheritable controls
- Industry-validated audit questionnaire responses
- Certification evidence generator

Security

Integrate Features for Automatic Security

- Smart security information and event management
- Encryption engine
- Data backups
- Internet interface security
- Built-in audit logs
- Port-forwarding

Platform

Build Environments with Ease

- One-click clusters
- Alert manager
- Disaster recovery engine
- Container registry integration
- Pipeline integration

What Makes MedStack Different?

Built for Digital Health

MedStack's security posture has been reviewed and accepted in implementation by healthcare enterprises, including several notable payers and providers in North America, as well as government agencies and academic institutions.

Compliant by Design

Privacy and security compliance is proactively built-in and hard-coded into MedStack's platform, not just delivered as a task list that then requires implementation.

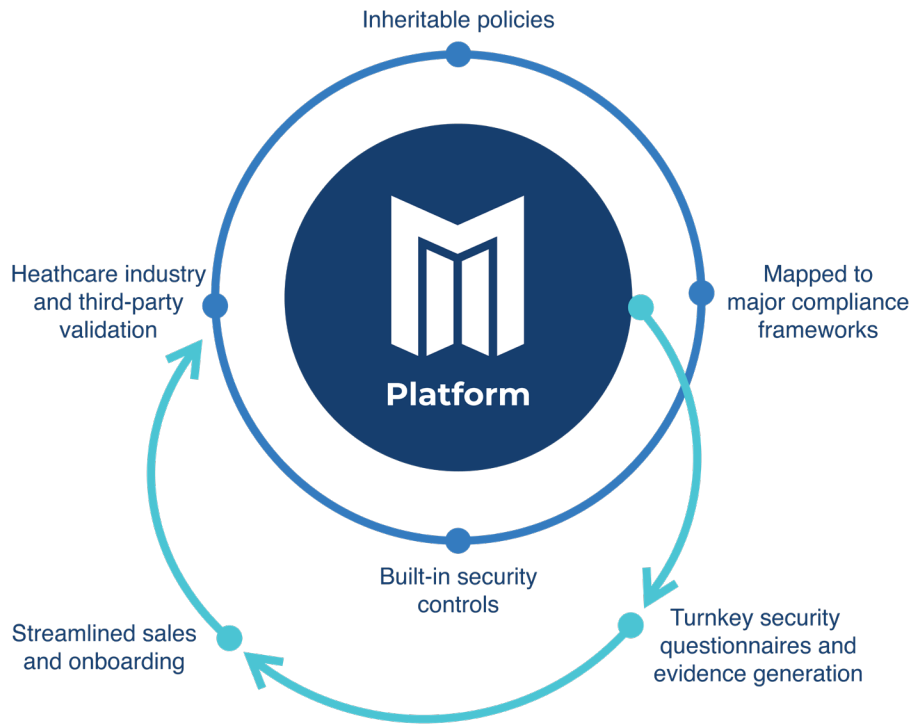

All-In-One Solution

With an exclusive focus on data security and privacy for digital health, MedStack brings together a turnkey cloud developer experience with industry-proven security architecture and associated inheritable policies and evidence generation tools for certifications, along with a seamless system to align validated responses to vendor security assessment questionnaires.

Supported Frameworks:

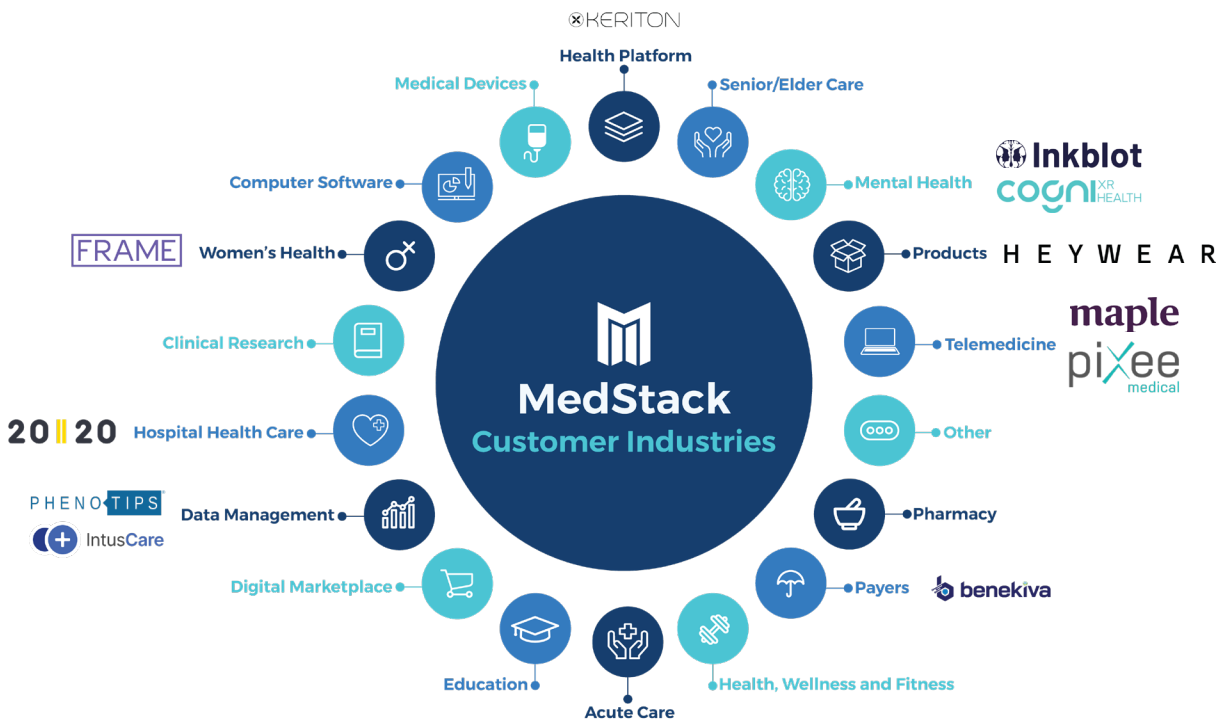

Privacy and security compliance for digital health, *guaranteed*.

Trusted by *hundreds* of leading healthcare technology companies:

“ Having MedStack as a partner has been absolutely instrumental to our success. With MedStack's understanding of the hurdles facing today's healthcare industry and their unique, comprehensive approach to compliance, they've played a key role in helping us get quality health care to more people when they need it. MedStack is a must-have partner for anyone looking to build a secure and scalable digital health technology solution. ”

- Luke Vigeant, CEO and Founder of Inkblot Therapy, now a Green Shield Canada company
